

# SUPER HIDERS

COME ON OVER;  
THE SNOW IS  
GREAT!

NOT YET.  
I'M STILL CHANGING  
INTO MY WINTER  
FEATHERS.

I REALLY  
BLEND IN. I'M  
ALMOST INVISIBLE!

HEY!  
WHERE DID  
THAT BIRD  
GO?

## DID YOU KNOW?

Ptarmigan have a super hiding power. It's almost like they can be invisible. They get two sets of feathers every

year: a brown set for summer and a white set for winter. That way, they can be camouflaged year-round. The

super hiding power of their feathers helps to keep them from being eaten by predators.
